AFTER HEARING FROM RESIDENTS, COMMISSION SELECTS SCHEME A FOR THE BOUGAINVILLA DRIVE DRAINAGE PROJECT

The **Town Commission** selected a design concept for the **Bougainvilla Drive** drainage project at its regular meeting on **Tuesday, March 27th**.

The design concept (Scheme A) isn't final. Modifications will be made to landscaping plans that will be brought back later to the Commission for approval.

Two design concepts were presented to the Commission on March 27. The Bougainvilla Drive residents attending the meeting urged the Town to make improvements to the street, but not at the expense of losing any parking spaces.

The main thrust of the project is to alleviate street flooding. Since the road was going to be torn up, the Town thought it would be prudent to also add landscaping and possibly more lighting to help beautify the neighborhood.

Trees and other landscaping will be placed on the street on public property where it does not interfere with parking.

Scroll down the page to view the proposed Scheme A design.

For more information, please call the **Public Information Office** at **954-640-4209**.
